PROGRESS IN BIOPHYSICS & MOLECULAR BIOLOGY

An International Review Journal

Volumes 81–83

Volume Contents and Author Indices

PII: S0079-6107(03)00075-0

PERGAMON

CONTENTS OF VOLUME 81

Number 1

Tight junction proteins
González-Mariscal, L., Betanzos, A., Nava, P. and Jaramillo, B.E. 1

Understanding complex signaling networks through models and metaphors
Bhalla, U.S. 45

Regulation of cardiac inwardly rectifying potassium channels by membrane lipid metabolism
Takano, M. and Kuratomi, S. 67

Number 2

Membrane targeting
Cereijido, M., Contreras, R.G., Shoshani, L. and García-Villegas, M.R. 81

Renal aquaporin water channels: from molecules to human disease
Schrier, R.W. and Cadnapaphornchai, M.A. 117

Physiological and pathophysiological roles of ATP-sensitive K^+ channels
Seino, S. and Miki, T. 133

Number 3

Fluid shear stress and the vascular endothelium: for better and for worse
Resnick, N., Yahav, H., Shay-Salit, A., Shushy, M., Schubert, S., Zilberman, L.C.M. and Wofovitz, E. 177

Early assembly of cellular life
Trevors, J.T. 201

Allosteric activation of plasma membrane receptors—physiological implications and structural origins
Conigrave, A.D. and Franks, A.H. 219

CONTENTS OF VOLUME 82

FOCUSSED ISSUE

Mechano-Electric Feedback and Cardiac Arrhythmias

Numbers 1–3

Editor's Note
Noble, D. 1

Editorial
Cardiac mechano-electric feedback: past, present, and prospect
Kohl, P. and Ravens, U. 3

Evolutionary origins of mechanosensitive ion channels
Martinac, B. and Kloda, A. 11

Swelling-activated chloride channels in cardiac physiology and pathophysiology
Baumgarten, C.M. and Clemo, H.F. 25

Differential effects of stretch and compression on membrane currents and $[Na^+]_c$ in ventricular myocytes
Isenberg, G., Kazanski, V., Kondratev, D., Gallitelli, M.F., Kiseleva, I. and Kamkin, A. 43

Stretch-modulation of second messengers: effects on cardiomyocyte ion transport
Kudoh, S., Akazawa, H., Takano, H., Zou, Y., Toko, H., Nagai, T. and Komuro, I. 57

Nitric-oxide-mediated regulation of cardiac contractility and stretch responses
Casadei, B. and Sears, C.E. 67

Do stretch-induced changes in intracellular calcium modify the electrical activity of cardiac muscle?
Calaghan, S.C., Belus, A. and White, E. 81

Stretch-induced excitation and action potential changes of single cardiac cells
Riemer, T.L. and Tung, L. 97

Cardiac fibroblasts and the mechano-electric feedback mechanism in healthy and diseased hearts
Kamkin, A., Kiseleva, I., Isenberg, G., Wagner, K.-D., Günther, J., Theres, H. and Scholz, H. 111

Dynamic properties of stretch-activated K^+ channels in adult rat atrial myocytes
Niu, W. and Sachs, F. 121

Mechano-electric feedback and atrial fibrillation
Ravelli, F. 137

The role of atrial dilatation in the domestication of atrial fibrillation
Schotten, U., Neuberger, H-R. and Allessie, M.A. 151

Mechano-electrical feedback underlying arrhythmias: the atrial fibrillation case
Franz, M.R. and Bode, F. 163

Mechanically induced sudden death in chest wall impact (commotio cordis)
Link, M.S. 175

Mechanical effects on arrhythmogenesis: from pipette to patient
Janse, M.J., Coronel, R., Wilms-Schopman, F.J.G. and de Groot, J.R. 187

Passive ventricular constraint
Power, J.M., Byrne, M., Raman, J. and Alferness, C. 197

Mechano-electric interactions in heterogeneous myocardium: development of fundamental experimental and theoretical models
Markhasin, V.S., Solovyova, O., Katsnelson, L.B., Protsenko, Y., Kohl, P. and Noble, D. 207

Effects of acute ventricular volume manipulation on in situ cardiomyocyte cell membrane configuration
Kohl, P., Cooper, P.J. and Holloway, H. 221

Sarcomere length changes in a 3D mathematical model of the pig ventricles
Stevens, C. and Hunter, P.J. 229

Electrotonic cancellation of transmural electrical gradients in the left ventricle in man
Taggart, P., Sutton, P., Opthof, T., Coronel, R. and Kallis, P. 243

Mechano-electric feedback and arrhythmias
Ravens, U. 255

CONTENTS OF VOLUME 83

Number 1

Intracellular sorting and transport of proteins
van Vliet, C., Thomas, E.C., Merino-Trigo, A., Teasdale, R.D. and Gleeson, P.A. 1

On the structure and function of apolipoproteins: more than a family of lipid-binding proteins
Bolanos-Garcia, V.M. and Miguel, R.N. 47

Number 2

Modelling intracellular H^+ ion diffusion
Swietach, P., Zaniboni, M., Stewart, A.K., Rossini, A., Spitzer, K.W. and Vaughan-Jones, R.D. 69

G-proteins as transducers in transmembrane signalling
Offermanns, S. 101

Molecular and mechanical bases of focal lipid accumulation in arterial wall
Chien, S. 131

Number 3

A tale of two tails: cytosolic termini and K^+ channel function
Varshney, A. and Mathew, M.K. 153

Calcium-induced calcium release in smooth muscle: the case for loose coupling
Kotlikoff, M.I. 171

Channels as taste receptors in vertebrates
Bigiani, A., Ghiaroni, V. and Fieni, F. 193

Volumes 81–83: Volume Contents and Author Index I
